"The Seabee Link to Readiness"

APRIL 02 SITREP

N3/5 Operations & Plan Department

LCDR Brant Pickrell, Director

<mailto:PickrellBD@cbchue.navfac.navy.mil>

- Final Four Plus Two contract reduced to Final Two Plus Two due to elimination of three RNMCBs. Statement of Work is being modified to reflect change.
- ILO development POA&M established. Current ILO/MMC plan posted on the intranet along with MMC generic POA&M and Final Two Plus Two Update.
- MUSE deployed a team to NRCC Singapore 18 March – 17 April for annual inspection. They also completed inspection and re-certification of the NBVC steam plant assisting with repairs that were required as a result of inspection.
- Developed CDM Plan and processes based on proven industry standards.

N4 Logistics Department

CAPT Anthony Steigelman, Director

<mailto:SteigelmanAE@cbchue.navfac.navy.mil>

- The Acquisition Division processed 68 MIPRs totaling \$11,673,242 for the month of March.
TOA Requisitions
 - Prepared, awarded, and processed approximately 340 TOA requisitions by credit card and Prime vendor (approximate \$192,000).
- Contractor Support Services
 - ELCAS(M) APLs (SYS) - Contract for ELCAS(M) APL revisions and option to cover WCTS new equipments (approx. \$150,000) was awarded.
 - Logistics Community Management Database (SYS) - Contract for interim database and reporting system to include NAVFAC claimant's training history and career development path (\$7,800) was processed and awarded.
- COR PROJECTS
 - FMS Taiwan SLWT Project - Based on approvals received late February, developed various Task Orders to provide the Taiwan desired contractor services for:
 - temporarily holding/maintaining SLWT until picked up
 - procuring all Collateral Equipment for Taiwan Training and Operational use

- providing lift & load services utilizing U.S. crane crews
- securing the SLWT to the Taiwan Freighter for transport
- providing off-load assistance upon receipt at the Taiwan shipyard
- conducting Operational/Maintenance Training for Taiwan Navy personnel
- Coordinating all arrangements for arrival of the Taiwan Freighter with the San Diego Port of Authority, Port Pilots, Harbor Agent, Taiwan Freight Forwarder, Taiwan Shipping Line Company. Arranged for/oversaw the shipment of the 82 crates of Lift/Launch Equipment to the Taiwan Freight Forwarder. Coordinated the release of all funds to meet the Task Order requirements.

PMS

- Introductory meeting was held with UCT1 and 3M Coordinator. Purpose of visit was to introduce NCBC 3M team to the UCT1 personnel and to explain where we were going with the program. UCT1 is to be next activity to be included in 3M implementation program.
- Currently revising and updating the 3M Implementation Plan, outlining and prioritizing the tasks necessary for a successful integration of the NCF into the 3M system. Expect to publish Implementation Plan on the internet by the end of April.

Communications:

- Coordinated equipment buys totaling \$916,743 for 2nd/3rd Brigades

CBR

- Developed ACRs to increase requirement allowance of M17 units for the NCF and NBG.

Weapons/NVD

- Attended 2 day weapons, training and equipment expo. Found source of safety gear for SESAMS gear and info on F.A.T.S. system that saved over \$3K on new screens.

N6 Communications/Information Technology Department

Joe Sweeney, Director

<mailto:SweeneyJR@cbchue.navfac.navy.mil>

- Coordinated Defense Messaging System (DMS) Training and setup for NCBC, 3NCB Det, 31st NCR, UCT 2, CHB 14, the PERSMOB Team, and the Naval Reserve Center at Port Hueneme.

- Added Seabee Skills Assessment Manual P-1105 to NCBC N7 intranet site.

NAVFAC Information Technology Center

John McCoy, Director

<mailto:McCoyJP@cbchue.navfac.navy.mil>

- NAVFAC CIO Conference On 12 through 14 March, NITC hosted a NAVFAC CIO Conference here at NCBC Port Hueneme. Attending were senior IT managers representing many of the Echelon III commands, PWC's, EFD's, EFA's, ESC, and specialty centers. The primary focus was on transition planning for NMCI throughout the claimancy. Draft project plans were prepared with each IT manager tasked to begin standing up their transition team. Areas of major interest are: legacy application rationalization, or cutting back on the number of applications used, developing strategies for compiling application accreditation documentation, preparing for NMCI certification testing and putting together teams at each site to manage their respective transition. Although there are not firm dates established by the NMCI Program Management Office (OPNAV N6) for cutover of NAVFAC components to NMCI, we are planning for a transition window beginning this fall and running through early spring CY03.
